

The Irish Government wishes to encourage people to invest in green alternatives for their homes by contributing to the initial investment cost of installing a renewable energy heating system. The Greener Homes Scheme provides grant assistance to homeowners who intend to purchase a new renewable energy heating system for either a new or existing home.

Newline Heating & Plumbing is a fully registered installer so all work we carry out is eligible for receipt of grant funding from Sustainable Energy Ireland. We will advise you on which product is most suitable for your needs and provide support with the application process.

Grants are available for the following products:

- Solar Panels/Collectors
- Heat Pumps
- Wood Chip or Pellet Stoves
- Wood Chip or Pellet Boilers
- Wood Gasification Boilers
- Condensing Boilers
